International Nursing and Health Care Conference

Dates:  
August 26-27, 2019

Venue:  
Valencia, Spain

Theme:  
Consolidating Recent Innovations and Knowledge in Nursing and Healthcare: A Major Challenge Across the Globe
Welcome Message

Welcome…!!!
On behalf of our OLCNHC-2019 Conference chair Prof. Elena L. Tolstov, from Saba University, Dutch Caribbean, USA Outlook Conferences is pleased to welcome you all for International Nursing and Health Care Conference, which will be held at Valencia, Spain during August 26-27, 2019, aims to become the leading annual conference in fields related to Nursing and Health Care. This conference have an elemental feature to the world distinguished motive speakers, plenary speeches, young Investigators & Researchers Forum, poster presentations, oral presentations, technical workshop and scientific sessions.

The goal of OLCNHC-2019 is to bring together researchers, scientists, engineers, and scholar students to exchange and share their experiences, new ideas, and research results about all aspects of Nursing and Health Care, and discuss the practical challenges encountered and the solutions adopted.

This conference offers good opportunities for the researchers and delegates to exchange new ideas, and to establish research and/or business links, as well as to build global partnership for potential collaboration. We sincerely hope that the conference will help advance knowledge in relevant scientific and academic fields.

We sincerely hope that this serves as an international platform for meeting researchers from around the world, widen professional contact and create new opportunities, including establishing new collaborations.

We are looking forward to seeing you at OLCNHC-2019 in Valencia, Spain.

Ph.D. Student Forum:

PhD Student Forum is the Outlook Conference’s flagship program and is a premier international forum for nursing & healthcare professionals to present their work. The Ph.D. Forum will provide an opportunity for a group of Ph.D. students to discuss and explore their research interests and career objectives with a panel of established professionals & researchers in Nursing & Healthcare. The consortium has the following objectives:

- To provide a setting for mutual feedback on participants’ current research and guidance on future research directions
- To develop a supportive community of scholars and a spirit of collaborative research
- To support a new generation of researchers by offering advice about academic, research, industrial, and non-traditional career paths
- To contribute to the overall conference goals through interaction with other researchers and participation in conference events
The Ph.D. Forum will be held on 2nd day of conference, as a full afternoon session during the main Nursing & Healthcare Conference. Students may apply to participate either as a workshop participant or as a speaker. Opportunity to get BEST POSTER/ YOUNG RESEARCHER AWARD for Students

Best Regards
Aaryan S
Conference Secretary
OLCNHC-2019
International Nursing And Health Care Conference

Conference Highlights

The Outlook Conference’s brings you an immense opportunity to be a part of scientific acceleration to world class personalities, young scholars, scientific delegates and young scientists to join in this forum to utilize the expertise and novelties that brings a new era for innovations in the field of Public Health which brings well versed scrutinizers at one place.

Sessions

- Nursing Education and Research
- Clinical Nursing
- Critical Care Nursing & Emergency Nursing
- Psychiatric and Mental Health Nursing
- Cancer & Oncology Nursing
- Cardiac Nursing
- Adult Health Nursing
- Women Health Nursing
- Legal Nursing
- Healthcare Pediatrics Nursing
- Oral & Dental Nursing
- Pregnancy & Midwifery Nursing
- Advanced Practice Nursing and Global Perspectives
- Nursing Education and International Trends
- Nursing Leadership and Global Influence
- Cross-cultural Nursing and Models of Care
- International Nursing and Global Health
- Nursing and Integrated Care
- Community Health Nursing
- Nursing Management
- Biomedical and Health Informatics
- Telemedicine and e-Health
- Healthcare And Mental Disorders
- Health & Wellness
- Nursing and Traditional Medicine
- Medication Errors in Nursing Pharmacology
- Infectious Diseases & Models of Care
- Evidence-Based Nursing
- Health Economics and Nutrition
- Environmental Healthcare
- Geriatric Nursing
- Gynecology and Obstetrics
- Innovations in Nursing Education & International Trends

Conference sessions will bring you the latest strategies, research, and best practices to improve outcomes through quality, safety and staffing. On behalf of Organizing Committee Members this is a call for interested speakers can send Workshop proposals on Nursing and Health care under scientific sessions above.

Workshop on
Use of Botulinum Neurotoxins (BoNT) in the Treatment of Chronic Headaches (Migraines)

Elena L. Tolstov, MD, PhD
Professor Clinical Skills and System and Disease
Saba University School of Medicine, USA

Learning Objectives:
1. Know the anatomy and pathophysiology of chronic headaches and migraines. Become familiar with other options treatment for those disorders.
2. Become familiar with BoNT mechanism of action and pathophysiology of therapeutic efficacy in chronic headaches and migraines treatment.
3. Become familiar with different BoNT products available on the world market for the treatment of chronic headaches and migraines (Botox, Dysport, Xeomin, NeuroBloc, etc.). Know the difference of different BoNT mechanism of action, being able to make a correct decision about the best BoNT for each particular patient.
4. Become familiar with BoNT injection techniques for the treatment of chronic headaches.
5. Become familiar with side effects, complications and danger of BoNT use in the treatment of chronic headaches and migraines.

Workshop will include 20 minutes oral PowerPoint presentation and 40 minutes of injection technique demonstration.

Elena L. Tolstov
Saba University School of Medicine, USA

Sponsors and Exhibitors Information

Outlook Conferences organizes interdisciplinary global conferences to showcase on revolutionary basic and applied research outcomes within life sciences including medicine and other diverse role of science and technology around the world.

Adding value to the experience while integrating your brand’s products will not only showcase the authenticity of the brand, but will result in great, objective 3rd party recognition that will move the influencer needle. When your brand purchases a Sponsorship package, it is committing itself to delivering experiential relevance and value to thousands of industry influencers including press, creative's and their millions of collective followers, who have come to expect nothing less from Outlook Conferences and its partners.

Outlook Conferences offers different packages for sponsors/exhibitors to demonstrate their support towards science and its people by providing financial contributions to facilitate the presentations of noble research findings, hospitality and other necessary management for the scientific gathering.

Visualize this partnership through the eyes of world class noble people…!!!!

About Nursing

Nursing is a profession within the health care sector focused on the care of individuals, families, and communities so they may attain, maintain, or recover optimal health and quality of life. Nurses may be differentiated from other health care providers by their approach to patient care, training, and scope of practice. Nurses practice in many specialties with differing levels of prescription authority. Many nurses provide care within the ordering scope of physicians, and this traditional role has shaped the public image of nurses as care providers. However, nurse practitioners are permitted by most jurisdictions to practice independently in a variety of settings. In the postwar period, nurse education has undergone a process of diversification towards advanced and specialized credentials, and many of the traditional regulations and provider roles are changing.

Nurses develop a plan of care, working collaboratively with physicians, therapists, the patient, the patient's family and other team members, that focuses on treating illness to improve quality of life. In the United States and the United Kingdom, advanced practice nurses, such as clinical nurse specialists and nurse practitioners, diagnose health problems and prescribe medications and other therapies, depending on individual state regulations. Nurses may help coordinate the patient care performed by other members of a multidisciplinary health care team such as therapists, medical practitioners and dietitians. Nurses provide care both interdependently, for example, with physicians, and independently as nursing professionals.

Nursing is the most diverse of all healthcare professions. Nurses practice in a wide range of settings but generally nursing is divided depending on the needs of the person being nursed.

The major populations are:

- communities/public
- family/individual across the lifespan
- adult-gerontology
- pediatrics
- neonatal
- women's health/gender-related
- mental health

There are also specialist areas such as cardiac nursing, orthopedic nursing, palliative care, perioperative nursing, obstetrical nursing, oncology nursing, nursing informatics, telenursing and emergency nursing.

Nursing in Spain

Nursing in Spain is regulated by the General Council of Official Associations of Nursing (Organización Colegial de Enfermería).

Migration

Nurses and health visitors in Spain are required to accumulate points to demonstrate the accumulation of experience to the regulator. Within the European Union points can be accumulated from experience in other EU countries, but Brexit would mean that experience in the United Kingdom would no longer count. As a result it appeared in early 2019 that Spanish nurses, where 3,370 were working in the National Health Service, were leaving the UK and returning to Spain or moving to Ireland. In 2015 there was a big and successful recruitment exercise for the NHS in Spain, although there were issues connected to the command of English language.
About Spanish Health System

The Spanish National Health System (Spanish: Sistema Nacional de Salud, SNS) is the agglomeration of public health services that has existed in Spain since it was established through and structured by the Ley General de Sanidad (the "General Health Law") of 1986. Management of these services has been progressively transferred to the distinct autonomous communities of Spain, while some continue to be operated by the National Institute of Health Management (Instituto Nacional de Gestión Sanitaria, INGES), part of the Ministry of Health and Social Policy (which superseded the Ministry of Health and Consumer Affairs—Ministerio de Sanidad y Consumo—in 2009). The activity of these services is harmonized by the Interterritorial Council of the Spanish National Health Service (Consejo Interterritorial del Servicio Nacional de Salud de España, CISNS) in order to give cohesion to the system and to guarantee the rights of citizens throughout Spain.

Article 46 of the Ley General de Sanidad establishes the fundamental characteristics of the SNS:

a. Extension of services to the entire population.
b. Adequate organization to provide comprehensive health care, including promotion of health, prevention of disease, treatment and rehabilitation.
c. Coordination and, as needed, integration of all public health resources into a single system.
d. Financing of the obligations derived from this law will be met by resources of public administration, contributions and fees for the provision of certain services.
e. The provision of a comprehensive health care, seeking high standards, properly evaluated and controlled.

About Venue (Valencia, Spain)

The port city of Valencia lies on Spain’s southeastern coast, where the Turia River meets the Mediterranean Sea. It’s known for its City of Arts and Sciences, with futuristic structures including a planetarium, an oceanarium and an interactive museum. Valencia also has several beaches, including some within nearby Albufera Park, a wetlands reserve with a lake and walking trails.
